move forward!

New FDL Website!

Fond du Lac contracted with the Revize company to develop the new Fond du Lac Reservation website. They are experts in government web design, and felt like a good fit for a large and varied website like ours. The site design is complete and now the FDL web designer is going over every page of the new site to ensure the layouts and content is up to date, and that search engine optimization (SEO) is enabled on each page, to make it easier for users to find what they are looking for. Several new pages have been added since the new site was put in FDL hands, and they are being added in as well.

The new site will boast a new web address as well, and will be found at FDLBand.org. Users will still be able to get there with the current FDLrez.com, but we will be promoting a changeover to the new domain going forward. The site should be ready to go live sometime in March, so look out for notices about this as the date gets closer!
